

News:

IFS now provides Commercial and Industrial Duct Cleaning.

Before

Dust Mite

Fungi

Pollen

Enlarged samples taken from HVAC duct debris. These pollutants can circulate freely through the air ducts of a poorly or improperly maintained HVAC system. 42,000 dust mites can be found in one ounce of dust.

“Benefits of improved IAQ (indoor air quality) are so large that this opportunity can not be ignored...these include improved productivity, increased profits, greater employee/customer/visitor health, and reduced health costs.”

-NEMI (National Energy Management Institute)

After

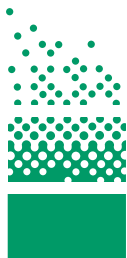

Breathe Easier.

IFS brings award winning service to the duct cleaning industry with state of the art equipment, trained technicians and 20 plus years of service experience.

Cleaning and sanitizing HVAC systems can net huge benefits such as increased productivity, reduced absenteeism and increased employee health for all kinds of businesses.

Call for a free video inspection of your A/C duct work. Let us show you why IFS is the preferred Commercial and Industrial vendor in our area.

Fresh air is our passion.
